

The Minikote Pro offers board mounting capabilities and desktop lamination using nearly any type of laminating film. Unlike other desktop systems, the Minikote Pro features rotating silicone rollers that are compatible with polypropylene (dry erase), polyester, and textured vinyl (PVC) films. The Minikote Pro is also capable of mounting onto boards up to 1/4" thick.

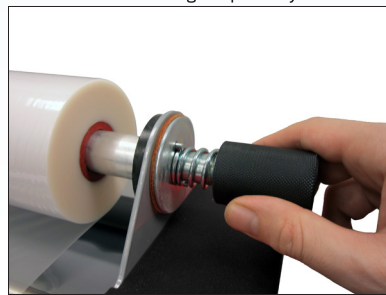

Safety Shield

Adjustable Levers for Board Mounting Capability

Touch Pad Controls

Tension Control

- Mount to rigid substrates such as foam boards up to 1/4" thick.
- Silicone nip rollers are compatible with nearly any type of laminating film up to 10 mils thick.
- Usage counter with reset easily tracks laminating film usage.
- Convenient hand held slit with storage on machine.
- Adjustable feed guide assures exact lamination.
- 1" mandrels standard.
- Safety shield for protection from heated rollers.
- Key switch prevents unauthorized use of laminator.
- Stop/Reverse button to reverse machine.
- Digital display with temperature, speed and usage counter readout.
- Temperature controls increase and decrease the temperature in one degree increments.
- Easily create dry erase graphics, floor & window graphics, and more

## Technical Specifications

Working Width:	27"
Laminator Width:	34"
Board Accommodation:	Up to 1/4" thick
Height:	15"
Depth(with feed tray):	20"
Net Weight:	66 lbs.
Shipping Weight:	73 lbs.
Speed:	0 -9.5 fpm
Electrical Requirements:	120V AC 60Hz 1400w
Standard Core:	1"
Film Accommodation:	1.5 Mil - 10 mil (Max supply roll 1000' @ 1.5 Mil)
