

INTELLICUT™

Cutting edge
imposition and
template management
software integrated
with the AeroCut

Design, Print and Finish Seamlessly

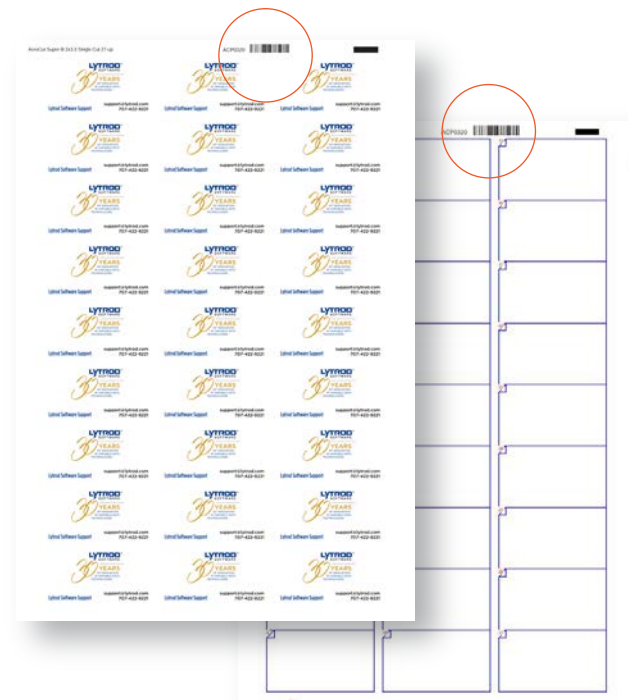

Intellicut is a groundbreaking approach to efficiently operate and manage your slitter/cutter/creaser document workflow. Easily impose artwork + address data to seamlessly create PDF layouts with job barcodes and cut marks for the AeroCut. Increase your shop's productivity with Intellicut to program and manage your AeroCut template library from any networked PC. Take control of your entire print and finishing workflow process with the Intellicut Software!

Automatically Program Your AeroCut!

Intellicut directly connects the imposition design process with programming of the AeroCut Slitter/Cutter/Creaser. Use Intellicut to create AeroCut compatible design layouts and compose barcode ready PDF print files with your artwork. That's it! Intellicut will send the exact cut, crease and perforation settings to the AeroCut through your office network connection, allowing your operators to pick up their print and put it right into the AeroCut. The AeroCut reads the barcode and automatically adjusts the machine to create perfectly finished pieces!

Template Based Barcode System

Over 170 Preset templates are available with your AeroCut and Intellicut generates perfectly imposed PDFs with template **barcodes**. Have a custom job? Create a template once that automatically saves in both your Intellicut library and in the AeroCut manuset library with your unique **barcode**. All you need to do is select the template, add artwork, print and cut!

AeroCut Smart

The Intellicut imposition tool uses Lytrod's proprietary **Smart Layout Assistant** technology. Select paper size, cut size, bleed edge and let the **Smart Layout Assistant** do the work for you, determining the perfect layout that will meet all AeroCut requirements. Download the template with one mouse click to your AeroCut. Save time and money by ensuring any layout you create will work seamlessly on the AeroCut.

Multipage Artwork Support

Intellicut supports whatever Variable Data tool you have today by imposing multi-page PDF files with ease (or you can use Intellicut's built in data merge features!). Intellicut ensures that pages are stacked in the correct order on your AeroCut.

Variable PDF Pages

Imposed Sheets

Step 1: Use Intellicut's Smart Layout Assistant to automatically create an AeroCut compatible layout, then add artwork to create your print-ready PDF with the AeroCut barcode.

Step 2: Intellicut can directly download the document layout template created by Smart Layout Assistant directly to your AeroCut through your office network.

Step 3: Send the Print Ready PDF created by Intellicut to your printer, these will be perfectly imposed and will include an AeroCut barcode.

Step 4: Place your print in the AeroCut, it automatically reads the barcode, adjusts the machine precisely and cuts! Even if page layouts change, the AeroCut adjusts on-the-fly.

AeroCut Edition

AEROCUT PRESET TEMPLATE MANAGER

- Instantly produce print files for over 170 preset templates with full barcode support.

SMART LAYOUT ASSISTANT™

- Create AeroCut manuset custom templates with guaranteed AeroCut compatibility.
- Send custom generated manuset template settings directly to the networked AeroCut.
- Manage your AeroCut's template library from your networked PC.

POSTAL MAILING

- Merging of addresses onto any AeroCut layout
- Intelligent Mail Barcode creation
- Automatic line ordering to retain data sorting for sheetfed AeroCut cutter

ADVANCED IMPOSITION FEATURES

- Multi-page PDF splitting, imposition and ordering
- Easy Imposition Layout Adjustment with AeroCut Compatibility Protection
- Toggle Advanced Imposition Project Settings Such As Record Repeat and Record Direction

AeroCut Prime

AeroCut Velocity

Bundled with AeroCut Velocity and AeroCut Prime.
